

# Subscription API

Please follow the documentation with URL <http://localhost:9191/swagger-ui.html#/>

1-create customer by addCustomer API

2- authenticate this customer by authenticate API

3- use the JWT token to access and please note to put “Bearer ” keyword with space at the first of the token in the “Authorization” header, like this

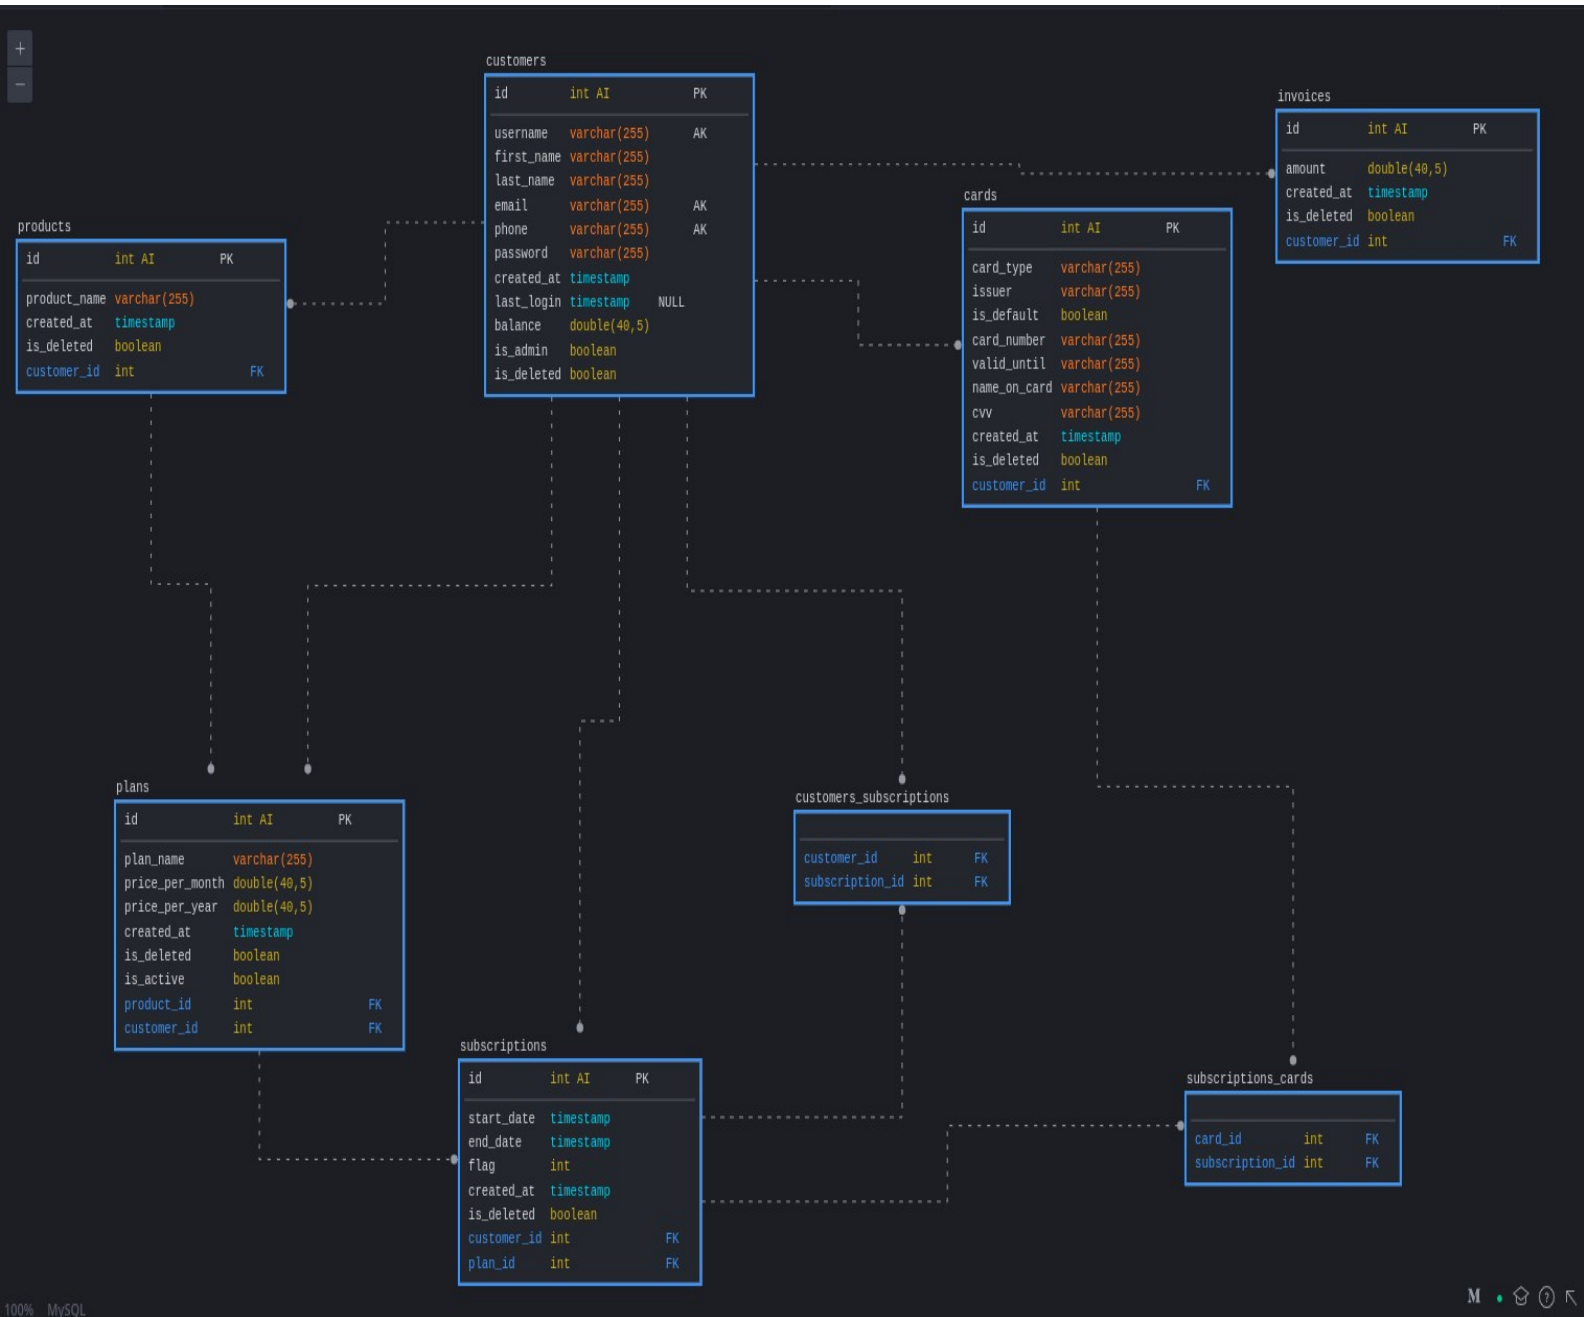

4- In this step you have two paths to add Card using addCard API with maximum number of 3 card mastercards or/and addProduct API

5- after that you then go ahead and addPlan API once you did added three plans they will be activated.

6- lastly then you can subscript in plan for first time or upgrade your plan using by level up your plan or extend the time starting from the current time using /{plan\_id}/upgrade API and the invoice will be released immediately in case you level up your plan or extended it;s time from now, you can check all of the invoices by findAllInvoices API.

## Entity Relationship Diagrams
